QNERC Young Scientists Seminar

A new regular seminar for young scientists in QNERC starts this semester. The new seminar is co-organized by four research associates in the QNERC, N. Machida, T. Maruyama, Y. Tsuchiya, and T. Watahiki, and also supported by professors in the QNERC. It is a good opportunity to discuss the state-of-the-art topics which are closely related to the recent progress of quantum nanoelectronics. All postdoctoral fellows and Ph. D students in the QNERC are encouraged to join our new seminar.

QNERC Young Scientists Seminar General Information

URL: http://www.pe.titech.ac.jp/~maruyama/qnerc_seminar/index.html (in English)

http://www.pe.titech.ac.jp/~maruyama/qnerc_seminar/index-j.html (in Japanese)

- 10/29 Fri Start, 1:20 pm - 2:50 pm, S9-605 room
- On Friday, Every second week
- 30 - 40 minutes talk, 50 - 60 minutes discussion
- Participating labs: Konagai-Yamada lab., Sandhu lab.(9F), Oda-Mizuta lab.(8F), Furuya-Miyamoto lab., Arai lab.(7F), Asada-Watanabe lab.(6F)
- Speakers are selected from Ph. D students, PD, and Research associates in the participating labs.
- Order: 9F -> 8F -> 7F -> 6F
- Participation of professors most welcome
- Opened for master course students, and undergraduate students
- Official language: Japanese or English

Details of 1st seminar will be soon available.
